DRY CABINET GHIBLI PRO 1400

GHIBLI PRO/1400L dry cabinet allows to create a safe enviroment to store MSD (Moisture Sensitive Devices). There's no need to configurate the product. Particularly suited for storing highly sensitive MSDs, according to J-STD-033 regulations.

Double dehumidifier modules

Portable Hygrometre

Easy to use:
The user doesn't need to set anything. After being plugged in, the cabinet will bring itself to 5% RH.

Security system in case of sensor's fault:
Dehumidifying modules work nonstop and aren't controlled by any sensor. This way they can be easily replace and cannot be affected by sensors' malfunctions.

Easy calibration:
The cabinet will be supplied with a portable hygrometre, visible from the upper glass pane. It allows to measure humidity and temperature inside the cabinet and has a datalogger to visualise and analise data from the comodity of your PC.

Easy-to-use

High performance

Minimal humidity levels

Incredibly low power usage

Technical Specifications:

Code	20616
Humidity range	5% guaranteed (tipically 2%)
External measures	1160x763x1660mm (feet excluded)
Internal measures	1090x605x1480mm
Weight	178kg
Shelves	5 height-adjustable
Structure	1,2mm thick steel
Doors	Hermetic closure with key, dissipative glass
Power Consumption	Max 500W, average 80W

Made in Italy
