## REINFORCED ESD-SAFE CART FOR EPAs

Essential in every electronic laboratory, it avoids the stagnation of electrostatic charges and prevents the risk of damaging sensitive electronic components while moving them. Thanks to structural reinforcements it has a load capacity of 280kg on smooth surfaces.

Reinforced 40mm tub shelf

Reinforced metallic integrated handle

### Technical data

Code	13808
Colour	grey RAL7035
Material	metal
Ground clearance	840mm
Measures	1000x600mm
Wheels	4 ø125mm wheels, 30mm wide, 2 with brakes
Load capacity	280kg with distributed load
Safety border height	40mm

conductive ø125 mm rubber wheel

complies to  
**IEC 61340-5-1**  
regulation

### Wheels components

Material	steel laminate
Movement	bearings
Finish	galvanised
Band	electroconductive thermoplastic polyurethane
Nucleus	electroconductive polyammide
