## LIGHTWEIGHT IONISING GUN

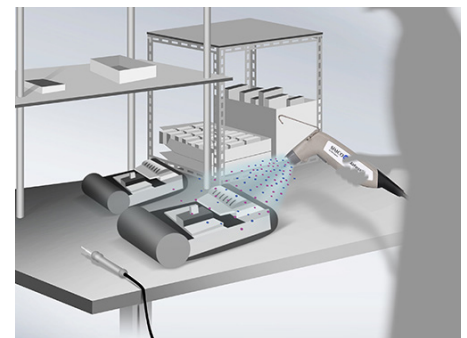

This ionising gun has been designed thinking about its user:

- The connecting tube is flexible and lightweight (the diameter is less than a centimetre) it moves with the user and simplifies his/her job.
- The high voltage cable has been removed, meaning more safety for its user.
- The ergonomic design of the gun allows with just a light touch of the trigger to lighten up the targeted spot with a LED light, reducing to a minimum wrist fatigue.

The compact console can be mounted anywhere, so it doesn't occupy precious work space, the ionising gun is silent and very powerful. It's the only instrument with ISO 14644 Class 4 cleanliness certificate.

Ergonomic handle

Example of use

### Technical data

Code	4096
Discharge time	$\pm 1000-100V$ 1.0sec at 15.2 cm, 30psi
Cleanliness	ISO14644-1 Class 4
Balancing	$\pm 30V$
Ionising flux	Constant
Measures	Gun (20,3x7,6x2,5cm) Console (26,6x7,6x4,1cm)
Weight	Gun (341grams), Console (326grams)
Noise level	70dBA at 1 metre, 30psi
Ozone	<0,005ppm
