## DRY CABINET GHIBLI PRO 700 WITH BAKING FUNCTION

The GHIBLI PRO/700L dry cabinet with Baking function, Other than the usual function of safely storing MSD (Moisture Sensitive Devices), it has a **Baking a 40°C** function. It is often used for **recovering** of taped electronic components.

### Easy to use:

The user doesn't need to set anything. After being plugged in, the cabinet will bring itself to 5% RH.

### Security system in case of sensor's fault:

Dehumidifying modules work nonstop and aren't controlled by any sensor. This way they can be easily replace and cannot be affected by sensors' malfunctions.

### Easy calibration:

The cabinet will be supplied with a portable hygrometre, visible from the upper glass pane. It allows to measure humidity and temperature inside the cabinet and has a datalogger to visualise and analyse data from the comodity of your PC.

### Additional accessories:

Tray / additional shelf code **20586** e wheel kit code **20786**
