

ECO ESD-SAFE TABLE

The ECO line workbenches are practical and sturdy. They have a steel sheet structure with RAL7035 grey powder coating. The table is built with antistatic-dissipative materials, not subject to deterioration; It doesn't allow the generation of electrostatic charges due to triboelectric effect; completely and permanently cancelling the electrostatic charge, produced by rubbing, settled on the user's body. Supporting structure in rectangular section 40x40mm steel tubes.

Ground clearance of 810mm and rounded corners.
