ECO ESD-SAFE TABLE WITH MULTISOCKET AND WHEELS

The ECO table is sturdy and practical, it has a metallic structure painted with a coat of ESD-SAFE epoxy powders in Grey RAL7035 colouring. Its supporting structure has also a 40x40mm square section, allowing the table's load capacity to reach 250kg with distributed load. The working surface is made out of static dissipative laminate, has a 900mm ground clearance and black ABS rounded corners. Thanks to the 12 schuko sockets power module and magnetothermic switch you'll always be able to easily power your tools. This model is easily moved thanks to its 4 wheels and its ESD-SAFE materials allow it to be used for electronic components-related tasks.

Technical Design:

Sturdy and practical

Easy to assemble

Multi-use

12 schuko power sockets

4 pivoting wheels with integrated brakes

complies to regulation
IEC61340-5-1

Technical specifications:

Code	20077
Colour	grey RAL7035
Load capacity	200kg with distributed load
Frame-Paint	dissipative epoxy powders
Worktop material	anti-scratch ESD laminate
Ground clearance	900mm
Worktop size	1800x800mm
Power supply	12 schuko sockets with magnetothermic switch

Superficial Resistivity

Rs worktop	$104\Omega < R_s < 109\Omega$
Rs paint	$103\Omega < R_s < 109\Omega$

Rubber wheel with brake

Made in Italy
