## AUTOADHESIVE COPPER TAPE

Designed in order to create a resilient pavement with permanent static dissipative features. In order to do so, a grid must be created. This will allow the pavement to slowly discharge towards ground ESDs.

### Technical specifications:

- Copper tape thickness: 0,04 mm
- Tape's length: 30 metres

### Technical specifications

Code	Width	Description
9149	10mm	Copper autoadhesive duct tape
3291	15mm	Copper autoadhesive duct tape

Creation of a grid with the duct tape before installing the pavement.
