ESD-SAFE REINFORCED CART WITH TWO SMOOTH SHELVES

This toolholding cart is a great choice for moving instruments and material inside labs. Thanks to its coat of static dissipative epoxy powders and ESD-SAFE rubber wheels, the cart can be used inside areas where a high degree of ESD safety is needed. Its frame has reinforcements that allow it to have a maximum load capacity of 180kg. An added handle makes it easy-to-use. The product complies to IEC61340-5-1 regulations.
