WORKBENCH FOR TWO USERS WITH WHEELS

The workbench with wheels has a metallica laminate structure with a square 40x40mm section and painted with epoxy powders. The worktop has a thickness of 27mm and a surface made out of antiscratch laminate and black ABS rounded borders.

Its 100mm diametre wheels allow it to be easily moved. In particular, they're made with an anti-trace synthetic rubber layer and a polypropilene core. After being successfully positioned the station can be locked into place by the 4 integrated brakes. Thanks to the two chromed footrest bars and the smaller lower shelf the workbench can be simultaneously used by two operators.

Easily movable inside a laboratory

Usable by two users contemporarily

4 wheels with brakes

Double chromed footrest bar

Technical Specifications:

Code	20887
Colour	grey RAL7035
Worktop material	anti-scratch antistatic laminate
Ground clearance	875mm
Worktop size	1330x800mm
Worktops thickness	27mm
Load capacity	180kg with distributed load
Wheels	4 360° pivoting wheels; Ø100mm

Wheels with synthetic rubber layer and integrated brake.

Worktop with rounded borders

The worktop made out of antistatic antiscratch laminate unites grey's elegant colour with innovative technology: Thanks to this paint the surface becomes anti-scratch and anti-stain

Made in Italy
