MULTITENSION MEGAOHMMETER

The multitension megaohmmeter is portable, precise and easy to use. Designed specifically for point-to-point resistance, resistance to ground and superficial resistivity according to IEC61340-5-1 regulations. The instrument has an internal memory card that can store up to 100 measurements. The saved data are:

- Resistance value
- Tension used for measuring
- Humidity during measuring
- Temperature during measuring

Vmeas	Field of measure	Precision
10V	10K Ω ÷ 50G Ω	±5% ±0.6% for G Ω
100V	100K Ω ÷ 1T Ω	±5% ±0.06% for G Ω
250V	500K Ω ÷ 1T Ω	±5% ±0.045% for G Ω
500V	1M Ω ÷ 1T Ω	±5% ±0.03% for G Ω

Instrument with probes and suitcase

Technical specifications

Humidity	from 1 to 95%RH
Temperature	from -20°C to +60°C
Display	LCD 128x64 pixel display
Power supply	6 LR6 1,5V batteries
Measures	243x130x60mm
Weight	650g

By pressing a dedicated button it's possible to quickly change measuring format between natural and exponential ones.

Product codes

Code	Product composition
17319	Strumento con batterie ed astuccio
17393	Kit completo - Strumento, 2 probe, batteria, valigetta, certificato di taratura
2802	Probe schermato 63mm - 2,3kg
19380	Probe ad anelli concentrici 63/30mm - 2,3kg
