GROUNDING NODE FOR WORKBENCHES

Our Earth Bonding Point is used on workbenches in EPAs to connect the user's bracelet to the worktop. Each input of the EBP has a $1\text{M}\Omega$ resistor in series and the output 1,5m cable must be connected to ground.

- Wire's length: 1,5mt
- Resistance to ground: $10^4 - 10^6 \Omega$
