CORNER KB EVO HIGH 1500 WORKBENCH

The CORNER KB EVO HIGH 1500 corner workbench with its structure takes full advantage of any lab's space. The LED lighting module, The double electric module with 6 schuko sockets and a magnetothermic switch make this model the best choice. The worktop has an anti-scratch laminate and 27mm thick black ABS borders. The setup's ground clearance is 860mm. Thanks to 15 millimetrically adjustable feet the configuration can always be leveled. For an even better lighting of the working area 2 LED 4200K illumination modules are provided and connected to the electric modules. By being composed of KB EVO workbenches, this model has the same feature of having a load capacity higher than 300kg.

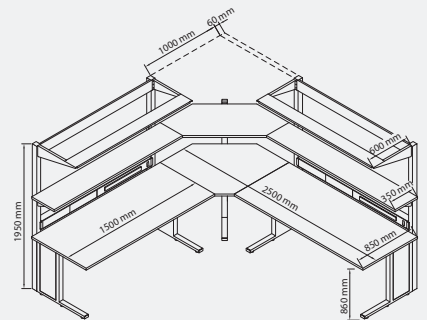

Equipment:

1950mm upright supports with double shelving, double electric module and double LED illumination module. The supports allow to add many more accessories such as monitor holding arms, tool holding panels and container-holding bars.
