KE HIGH ESD 2000 WORKBENCH

The KE HIGH 2000 workbench has a sturdy and robust structure. This model is the perfect choice due to all of its add-ons: A shelf with quick adjustment, an electric module with 6 schuko sockets and a LED illumination module. The workbench is built with antistatic dissipative materials not subject to wear over time that do not allow the creation of electrostatic charges thanks to the triboelectric effect. It completely and permanently nullifies electrostatic charges produced by rubbing or carried by a worker. The working surface is made of anti-scratch laminate with black 27mm thick ABS borders. The ground clearance is 800mm. Thanks to 6 millimetrically adjustable feet the workbench can always be levelled.

Equipment:

1950mm high upright supports with a rapid attachment shelf, an electric module with 6 schuko powersockets with a magnetothermic switch and a LED 4200K illumination module. The columns offer the option to add various accessories.

Technical Design:

Easy to assemble

Working surface and shelf made with anti-scratch laminate

6 schuko modular electrified bar

6 millimetrically adjustable feet

Rapid attachment shelf

LED illumination

Tool-holding bar

complies to
IEC61340-5-1
regulation

Made in Italy

Technical Specifications:

Code	18579G
Colour	grey RAL7035
Load capacity	200kg with distributed load
Frame-Paint	dissipative epoxy powders
Worktop material	anti-scratch laminate
Ground clearance	800mm
Working surface size	2000x850mm
Shelf size	2000x350mm
Illumination	LED ceiling light, 220-240V, colore 4200K

Superficial Resistivity

R _s Working surface	10 ⁴ Ω < R _s < 10 ⁹ Ω
