KER HIGH 1500 ESD WORKBENCH

Manually height adjustable workbench

The KER line allows the user to adjust the worktop and the backside on 4 levels, starting from 800mm ground clearance up to 1000mm. This model has been designed to offer more comfort to the user both while seated and while standing up. The adjustment can be done by simply moving 4 pins. This model is supplied with a height adjustable shelf, an electric module with 6 schuko sockets to power all your needed tools and a LED illumination module useful in work environments where additional light is needed. Thanks to the frame being painted with a coat of static dissipative epoxy paint and the working surfaces having an antistatic dissipative laminate this model complies to IEC 61340-5-1 regulation.

Technical Design:

Easy to assemble

Height adjustable

Tool holding shelf

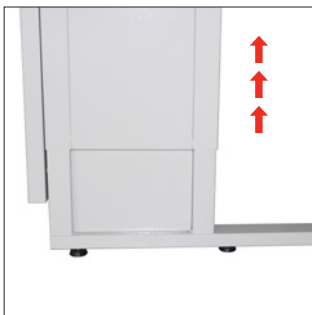

ESD-SAFE frame and working surfaces

Electric module with 6 schuko sockets

LED 4200K illumination kit

Technical Specifications:
