KER HIGH 2000 WORKBENCH

Manually height adjustable workbench

The KER line allows the user to adjust the worktop and the backside on 4 levels, starting from 800mm ground clearance up to 1000mm. This model has been designed to offer more comfort to the user both while seated and while standing up. The adjustment can be done by simply moving 4 pins. This model is supplied with a height adjustable shelf, an electric module with 6 schuko sockets to power all your needed tools and a LED illumination module useful in work environments where additional light is needed.
