OFFICE CHAIR WITH SYNCRO TECHNOLOGY

Office chair with **high backrest** in black net and **armsrests**.

This model has **Syncro** technology (backrest and seat adjustable in 4 different positions) with steel lever and **anti-shock** system, the backrest returns to its initial position only if the back is pushed on the backrest. the **tension regulator** mechanism allows to regulate the moving tension of the mechanism. The lumbar section is supported by the manually adjustable lumbar support. Inside the seating area two reinforcements steel bars that make the chair extremely robust. The seating is padded with 40 rating expanded foam with cloth. The 5-spoke base is in nylon with hard plastic wheels. The height of the chair is adjustable through a gas piston.

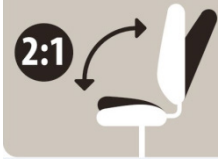

Backrest with Syncro technology

Seating coated with fireproof fabric

Net backrest

Tension regulator

Syncro

Syncro mechanism

The synchronised mechanism consists of an oscillation of both the seating area and the backrest, guaranteeing a good back support and allowing to block the chair in the preferred position.
