## POWERFUL IONISING BAR

This ionising bar model easily nullifies electrostatic charges on the entire working area thanks to its powerful airflow. The instrument is equipped with a LED that confirms correct functioning.

The ioniser emits hot air too and its user-friendly. It is also equipped with a patented auto cleaning technology module for the fans and ionising system

### BENEFITS

- protects even the most sensitive electronic component
- user-friendly
- stable structure
- system for checking whether the unit is working properly
- easy to maintain

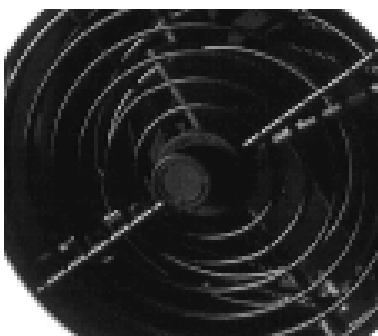

Example of use

### Technical data

Code	15186
Discharge time	3.0 seconds at 46cm from 1000 to 100V
Cleanliness	ISO14644-1 Class 4
Ionic balancing	0 ±10V at 46 cm from the unit
Coverage	61x122cm
Measures	108,6x10,2x17,1cm
Weight	7,3kg
Noise levels	50dBA at low speeds, 60dBA at high speeds
Hot air	From 0 to 50°, 30-70% humidity without condensation
Airflow	254 m³/h at low speed, 509m³/h at high speed

Each fan of the unit has a cleaner. It can be used manually in order to clean the fan in a couple of seconds avoiding debris.
