

MEASURING COLUMN STATION FOR BRACELET AND FOOTWEAR

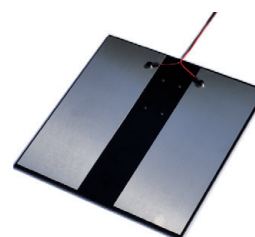

Test station for simultaneous verification of correct grounding of the user's bracelet and footwear, according to **IEC 61340-5-1**. The footwear measuring is done independently between left and right foot at 50V or 100V for higher accuracy. Through an inner relay it is possible to access EPAs. Power supply: 9V battery or 9Vcc external power supply. ISO9000 certificate included.
