SMD counting of taped components

It can work in two modes

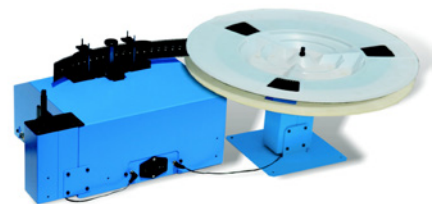

EMPTY POCKET CHECK Verifies the component is present (OPTIONAL ADD-ON)

Piece counter with empty 360mm aluminium reel
code 4912

It's possible to connect the piececounter to a printer and a barcode pistol.
code 16362 and 16359

Support for reels with more than Ø400mm **code 16842**

DIGITAL MOTORISED PIECE COUNTER FOR TAPED SMD

The motorised piece counter for taped SMD products can work in two modes:

Total: the components are counted starting from 0, the count will automatically stop when the counter finishes without losing count.

Pre-selection: selecting a number, the counter will start the countdown until it reaches zero.

Technical features:

- Count: up to 999999 pcs
- Maximum counting speed: 220 pcs/s
- Maximum tape height: 56mm
- Maximum reel diameter: 400mm standard configuration, 650mm with specific support
- Display: blue LCD with retroillumination 160x104 pixel
- Adjustable advancement speed
- Step by step advancement: 1 component at a time
- Barcode reader input
- Serial connector for PC/printer: YES
- Weight: 10kg

Technical data

Code	Description
16358	Motorised piece counter 230V/50Hz
16605	Motorised piece counter with Empty Pocket Check 230V/50Hz
16842	Support for > Ø400mm reels
4912	Empty Ø350mm aluminium reel
16362	Barcode reader pistol
16359	Direct thermal printer
