

## TEKMATRIX 32

### HUMIDITY AND TEMPERATURE INDICATOR WITH DATA LOGGER AND ALARM

Precise and elegant wall mounted indicator with easy to see display for measuring humidity and temperature. Equipped with an acoustic alarm, it can warn users when the LOW and HIGH RH/T tresholds are surpassed. When this alarm is active, additional circuitry can be activated through the relay output. The internal datalogger records enviromental data that can be afterwards downloaded on a PC through **USB** or **ETHERNET** (the software "LogManager" is included). The instrument's sensor can be hooked to the display or positioned externally. It's possible to set it on RH/T only or alternated with date and time.

#### Technical data

Code	<b>19244</b>	<b>19385</b>
Alternative code	<b>8105.113E</b>	<b>8105.113U</b>
Interface	<b>Ethernet</b>	<b>USB</b>
Humidity	from 1 to 95%RH	
Temperature	from -20°C to +60°C	
LED display	190x190mm	
Measures	Ø300x40mm
