## METALLIC CHEST OF 3 DRAWERS WITH WHEELS

Mono-block structure, made out of first choice laminate with a thickness of 8/10 and 15/10 reinforcements that grant more sturdiness and product life. Interchangeable sliding drawers, equipped with dividers. Yale type locking mechanism that closes all 3 drawers with two duplicate keys. Without handles, it has a lateral opening handle. Equipped with an anti-overturn mechanism. Rounded upper laminate and completely painted with epoxy powders. It can be moved thanks to 4 Ø60mm wheels, two of which are dissipative.

### Technical data
